Textile Research

Vol. X, 1939-40

RESEARCH REPORTS AND ARTICLES

Subject Index

PAGE

Behavior of Gelatins and Glues in Size Baths at Low Concentrations 341
Combination of Wool Protein with Acid and Base: Hydrochloric Acid and Potassium Hydroxide 181, 229
Compression Tests on Rayon Flock 425
Concerning the Existence of Fractions of the Sericin in Raw Silk 221
Determination of Regain of Sized Rayon Warps: Checking the Efficiency of One Type of Warp Conditioner 420
Determination of Uronic Acids in Cellulosic Materials 109
Effects of Drying Conditions on Properties of Textile Yarns 493
Electrodialytic Estimation of Ash and Acidic and Basic Groups in Textile Fibres 380
Equipment for Conditioning Materials at Constant Humidities and Elevated Temperatures 334
Guanaco Fibres 22
Influence of Electrolytes on the Ballo-Electric Effect 149
Method of Fibre-Length Analysis Using the Fibrograph 510
Microscopic Examination of Cotton Fibres in Cuprammonium Hydroxide Solutions 323
Moisture Control: Practical Application in Rayon Slashing 526
Regain of Acetylated Silk Fibroin 126
Relations of Textile Fibres at Elevated Temperatures 357

PAGE

Pectic Substance in Cotton and Its Relation to the Properties of the Fibre 269
of Cotton Fibres in Relation to Growth 449
Photochemical Decomposition of the Cystine in Wool 17
Refractive Indices of Textile Fibres: Double Variation Method for the Determination of 79
Relation and Cation Exchange to the Acidic Properties of Cotton 405
Relations Between the Food and Silk of Silkworms 462
Removal of a Sulfur Black Dye from Suspension by Flotation Methods 201
Result Obtained by Use of an Oil-type Size on Viscose Rayon 446
Sampling of Domestic Wool for Shrinkage Determination 193
Technical Evaluation of Textile Finishing Treatments.
Flexibility and Drape as Measurable Properties of Fabric 5
Use of Rank Correlation for Comparison of Data 453
Three Years of Textile Drying Research 443
Tube for Studying Dilute Sediments 280
Twist Determination in Single Yarns 120
Viscose Rayon: Stress-Strain Properties.
Effect of Specimen Length 287
Effect of Rate of Load 316
Effect of Relative Humidity 372

ABSTRACTS

Subject Index (Cross-Indexed)

A

Abrasion Testing Apparatus: Improved 306
Absorption of Alkali, and Swelling: Cellulose Fibres 215
Acetate Rayon: Burn-out Printing 437
Dyeing of—and of Acetate Rayon Mixed Fabrics 259
Dyer: Some Problems of the 98
Gas Fading of Dyes on 32
Mechanical Properties of Stretched 532
Warps: Sizing 532
Acetate and Viscose Rayon Fabrics: Processing of 98
Acid Azo Dyes: Metallized 261
and Chrome Dyes: Unlevel Dyeing of Wool with 100
Content of Carbonizing Baths: Sodium Sulfate Error in Measuring 305
Determining—in Wool 102
Dyeing: Density of Wool in Relation to 536
Dyes in the Processing of Various Shades on Animal Fibre: Notes on Tinctorial Function of Component 98
Wool Dyes: Imparting Affinity for—to Regenerated Cellulose Fibres by Incorporating Synthetic Resins in the Spinning Solution 211
Adsorption Method: Dyeing of Wool by the ... 260
Aeroplane Dopes: Cellulose Ester and Ether—Effects of Solvents, Diluents and Plasticizers 348
Composition and Qualities 437
Aging and Molecular Size of Chain Complexes in Solution 440
Air Conditioning and Rayon 175
Alginic Acid and Alginates 438
Use of—in Manufacture of Printing Colors.. 438
Alkalis: Action of—on Cotton-staple Fibre Mixtures 212
Reaction with—of Cellulose 215
Solubility in—of Natural and Regenerated Celluloses 103
Treatment: Staple Fibre 136
Alkaline Peroxide Solutions: Stability of 348
Printing Media: Reducing Action in—of Cellulose 259
Allwörden Reaction: Cause, Nature and Significance of 350
Aluminum Triformate as a Waterproofing Agent. 438
Amino Acids: Separation 486
Ammonium Salts: Dissociation of—in Contact with Wool 99
Amoa Test for Analysis of Mixtures of Sisal and Manila 350
Ancient Fabrics and Paper: Degree of Polymerization of Cellulose 215
Aniline Black: Printing 135
Animal Fibres: Measurement of Cross-sectional Contour or Ellipticality of 101
and Vegetable Textile Fibres: Water of Constitution and Water of Hydration of ... 299
Animalized Cellulose Fibres: Affinity for Acid Wool Dyes 211
Fibres and Casein Wool: Dyeing Properties of 32
Anti-Shrink Business 26
Anti-Tarnish Paper: Investigation of 310
Application of Naphthol Dyes to Cotton and Other Textiles 438
Arachis Oil: Detection of—in Crude and Rectified Oil from Pressed Olives 440
Aridye Process of Printing 211
Artificial Bleaching of Phormium Tenax (New Zealand Flax) 476
Daylight for Color Grading of Agricultural Products 215
Fibres (Staple Fibre): Determination of—in Mixtures Containing Cotton and Other Vegetable Fibres 307
Dyeing of 536
Prepared from Hydrated Cellulose and Fibres from Natural Cellulose: Simple and Rapid Method for the Quantitative Separation of 350
X-ray Study of the Orientation of 532
Resins in Textiles: Deposition of 438
Automatic Steam Sterilizer 300
Azo Dyes: Electrolytic Formation 98
Azoic Colors—Improved Fastness to Rubbing on Piece Goods 535
Dyes 211

B

Bacteria and Mold Damage in Textile and Allied Industries 40
Prevention of Damage to Wool by 212
Baddeley Shuttleless Loom 300
Basic Colors: Fixation of—with Tannin by Simple Steaming without Passing through Tartar Emetic 171
Bast Fibres: Bleaching of Cellulose, with Special Reference to 300
Bleach (for Textiles)—Catalytic Damage to 482
Bleached Wool: Cause of Yellowing 300
Bleaching: Causes of Loss of Hydrogen Peroxide in 33
Cotton Rayon Mixtures 348
of Cellulose, with Special Reference to Bast Fibres 300
Lanital-Rayon Mixture Fabrics 535
of Linen: The Effect of Sodium Bicarbonate on the 540
Linen: New Process of 26
Liquors (Peroxide): Decomposition and Stabilizing 537
Rayon: Damage in 35
Time: New Non-kier Boil Method Reduces. 168
Blending Staples to Increase Strength 301
Botany Card: Carding Crossbreds on the 26
Brabender Viscose Ripening Tester 101
Breaking Strength of Sized and Unsized Yarn.... 307
Burst Test: Increasing the Accuracy of Mullen.. 173

C

C. I. E. System: Lovibond Tintometer Adapted by Means of the Rothamsted Device to Measure Colors on the 311
Calculations: Stereoscopic 351
Calibration of Silk Porosity Meters 350
Capacitance of Textile Materials in Relation to Moisture Content 26
Carbonized Piece Goods: Dyeing 31
Carbonizing Baths: Sodium Sulfate Error in Measuring Acid Content of 305
Practice 168
Wool 210, 347
Wool-Acetate 301
Carder, Know Your Cotton 26
Carding Crossbreds on the Botany Card 26
Process with Long Staple Synthetics 532
Casein 103
Fibre 26
Combed Sliver: Dyeing 98
Manufacture and Properties 26
Present Status of 254
Spinning 476

PAGE

Wool Mixtures: Preliminary Treatment, Dyeing and Finishing 301
Technical Specifications for—for the Production of Artificial Wool 532
Use of—in Felts 169
Vinyl Resin Mixtures: Spinning 390
Wool and Animalized Fibres: Dyeing Properties of 32
Catalytic Damage to Bleach (for Textiles) 482
Caustic Soda: Solubility of Viscose Staple Fibre in 95
Cell Walls: Sub-Microscopic Structure 440
Cellulose Acetate Printing 482
Acetate Rayon: Dyeing 211
Dyeing—with Acid and Direct Dyes .. 349
Dyes: Application 258
Warps: Developments in Processing ... 478
Acetates: Stabilization of 143
Staple Fibre: Spinning on Cotton Machines 392
Attack by Micro-Organisms 486
Bleaching of—with Special Reference to Bast Fibres 300
Changes Undergone by—During Heating ... 311
Chemical Modification of—with Some Observations on the More Recent Developments in Textile Finishing Processes ... 258
Compounds: Studies on 103
Depolymerization 212
Derivatives: General Properties 103
Properties and Uses of Non-thermoplastic 98
Ester and Ether Aeroplane Dopes: Effects of Solvents, Diluents and Plasticizers.. 348
Vapor Pressure over Solutions of 352
Ethers and Esters of—and Their Commercial Applications with Particular Reference to the Textile Industry 346
Fibres: Absorption of Alkali, and Swelling.. 215
Dyeing—with Wool Colors 31
Experiments to make Visible the Inner Structure of—by Depositing Extraneous Materials 390
Strength and Degree of Polymerization.. 390
Structure 254
in Technical Felts 27
X-ray Diffraction Investigation on a Homologous Series of 299
Fibrils: Dimensions and Structure 390
Heterogeneity of Various Kinds of 141
Heterogeneous Hydrolysis of Fibrous Triacetyl—by Acid and the Acetone Solubility of the Partially Hydrolyzed Product 543
Hydrate Filaments: Deformation and Structure 345
Investigation of Lattice Structure of Native 207
Measurement of the Dielectric Constant of.. 104
Methylation of 103
Micellar Structure of 40
Modification of—by Oxidation 440
Native and Regenerated 391
Network Structure of 103
Neutral Salt Solutions of 40
Reaction with Alkali 215
Recently Developed Sources of 167
Reducing Action in Alkaline Printing Media 259
Refractive Index and Degree of Swelling ... 486
Relation between the Lattices of Native and Hydrate 543
Research, 1933–37 103
Solubility in Alkalis of Natural and Regenerated 103
Xanthate: Reactions of—and Their Technological Importance 255
Cellulosic Materials: Cryoscopic Determination of Moisture 307
Determination of Uronic Acids in 352
Theory of the Viscometric Method of Determination of the Wear-Resistance of .. 390
Sheet Materials: Optical Anisotropy and the Structure of 544
Textile Industry: Trend of Progress in 168
Certified Climate in Worsted Mills 168

PAGE

Chain-Molecules in Solution: Kinetics of Reaction of. Alkaline Saponification of Polyvinyl Acetate 543
Chain Structure of Linear Polyesters: Further Investigation of the 215
Chemical Analysis: Grade Determination of Raw Cotton by 95
Textile 439
X-ray Diffraction Applied to 352
Developments in the Textile Industry: Important 259
Dyeing Processes: Some New 31
Investigations on the Fleece of the Sheep .. 476
Precipitation of Textile Wastes and Studies of pH Control 487
Chemistry of Silk and Silk Processing: Recent Developments in 259
Chinese and Other Carpet Wools: Improvement of 391
Chlorination of Wool 483
Chrome Dyes: Prevention of Dull Shades Due to the Presence of Iron in the Dyebath, when Dyeing with 212
Mordanting: Silk 397
Circulating Dye Bath for Piece Goods: Dyeing Apparatus with 259
Climatic Exposure on Textile Fibres and Fabrics: Effect of 478
Clinging Power of Fibres on Yarn-strength Irregularity: Effect of 27
Cloth Conditioning: New Departures in 392
Crêping of 533
Faults Traceable to Reeds and Healds (Harnesses) 392
Shrinkage: Effect of Yarn Twist and Tension on—with Particular Reference to Sanforizing 168
Coating Fabrics: Lustre on 30
Color Analysis: Determination of Hydrogen Ion by 308
of Dyes: Theory of the 487
Film in Photomicrography 263
Grading: Artificial Daylight for—of Agricultural Products 215
Lovibond Tintometer Adapted by Means of the Rothamsted Device to Measure—on the C. I. E. System 311
Measuring Devices—New 485
Method of Designating 261
Test for the Detection of Bleached Woolen Fibres 539
Colorimeter: Photo-electric 309
Committee D–13: History of 104
and Its Relation to the Textile Industry ... 104
Competitors of Wool 531
Congo Red Test: Examination of Damaged Cotton by the. Further Developments and Applications 540
Consumer Textile Goods: Labeling of 30
Continuous Dyeing of Wool and Half-Wool: Method Based on Theory of Turgescence 483
Filament Rayon Warp Slashing 257
Yarns: Theory and Experiment of Twist in 96
Peroxide Bleach 301
"Control" in a Textile Finishing Works 27
"Conveyor" Piece Dyeing Machine 535
Copper and Manganese: Determination 487
in Fabrics: Determination of 101
Simple Micro-Test for 484
Cotton Bales: Uptake of Moisture 263
Broadcloth: Consumer Classification and Specifications for 168
Carder, Know Your— 26
(New) Cord Constructions: Claims for 301
Drying in Field of Short-Wave Condenser .. 399
Fabrics: Effect of Weave on Structure 168
Fibre: Inter-relationships of Measurable Characters 24
Methylation of—with Ethereal Diazomethane 477
Fineness and Maturity of 345
and Flax Industry 170

PAGE

Fluidity of—in Dimethyldibenzylammonium Hydroxide—Measure of Cotton Degradation 541
Hair: Development 391
Structure 24, 25
Uncollapsed and Mercerized Diameters.. 25
—How Long is One-Inch 480
Materials: Indentification of—Vat Dyes on Linen and 398
New Uses for 27
Piece Goods: Semi-resin Finishes for 303
Production of White Egyptian 346
Quality: Possibilities and Limitations of the Spinning Test as a Means of Determining 27
Rayon Mixtures: Bleaching 348
Sewing Threads: Manufacture of 27
Spinning Equipment and Its Adaptability to Rayon Staple Fibre 301
Machines: Production and Efficiency Determinations 28
Staple Fibre, Lanital and Wool Yarns: Thermal Conductivity 262
Mixtures: Action of Alkalis on 212
Mercerization of 172
Stapling: Modern 255
Yarn: Effect of Employing Different Speeds in the Draw Frame on the Quality of 27
Doubling and Cabling 301
Empirical Relationships between Count, Twist and Strength of 169
Strength 262
Cottonizing Flax and Hemp 29
Cottons of Egypt 255
Count Variation in Worsted Yarns 101
Covered-Rubber Yarn: Enemies of 392
Crease Resistance: Search for 31
Crêping of Cloths 533
Crimp in Raw Wool: Measurement of 101
in Rayon Staple Fibre: Its Creation and Retention in Spinning 169
Cross-sectional Contour or Ellipticity of Animal Fibres: Measurement of 101
Crude Wool: Degreasing of 255
Cryoscopic Determination of Moisture in Cellulosic Material 307
Cuprammonium Solution: Characterization of Plant Cell Walls by Treatment with 142
Cut Staple Rayon Fibre: Practical Methods of Running 258
Cystine Content of Deaminized Proteins 264
in Wool: Photochemical Decomposition of .. 312

D

Damage in Laundering Staple Fibre Fabric 310
to Wool by Bacteria: Prevention of 212
Dark Light 262
Deaminized Proteins: Cystine Content of 264
De Coding Slasher Charts 393
Decomposition of Hyposulfite and Rongalite: Products of—under Conditions of Their Use in Cotton Mills 483
of Linseed Oil Sizes 33
and Stabilizing of Peroxide Bleaching Liquors 537
Defects in Textiles: Can Air be the Cause of 487
Deformation of Fibrous Materials: Mechanism of 142
Degradation of Oriented Cellulose Structures by Polarized Ultra-violet Light 488
Degreasing of Crude Wool: Causes of the Damaging Effect of Fat Solvents in the—by Benzine and Trichloroethylene 255, 349
Degumming and Bleaching Decorticated Ramie Fibre (China Grass) 531
Method of—and Chemistry of Ramie Fibres 298
Silk-Acetate Rayon Mixtures 539
Deniers and Filament Numbers: Changes in American 28
Density and Inter-micellar Spacing of Fibres ... 307
of Wool in Relation to Acid Dyeing 536
Depolymerization of Cellulose 212
Designs: Pre-Testing 435
Detection of Hard Impurities in Fibrous Materials 169
Detergency Tests: Laboratory 439
Detergent Properties of Ether Sulphonates 212

PAGE

Determination of Lanital in the Mixed Fabrics with Natural Wool 540
Dial Reading Apparatus for Determination of Fibre Strength 37
Dielectric Constant of Cellulose: Measurement of the 104
Direct Colors: (New) Formaldehyde After-Treated 396
Doubling and Cabling Cotton Yarns 301
Dry Cleaning: Application of—to Mill Processes 301
vs. Cloth Scouring 393
Drying Apparatus Automatic Controls 101
Cotton—in Field of Short-Wave Condenser .. 399
Cylinders: Measurement of Cloth Temperature and Moisture Content 169
Felt 28
Machinery: Textile 96
of Paper Sheets: Effect of Hydration on the Rate of 141
Some Principles of 104
of Textiles: Theory and Practice of 478
Use for—of near Infra-red Radiation 264
Duerst Method of Figuring Progressive Yarn Twist 478
Dufaycolor: Photomicrography and Record Photography with 174
Dull Shades: Prevention of—Due to the Presence of Iron in the Dyebath, when Dyeing with Chrome Dyes 212
Dye Solutions: Migration of Substantive Dyes into Rayon Fibres, in Comparison with the Behavior of—and the Gel Structure of Fibres 172
Dyed Cottons: Effect of Finish on Shade of 171
Materials: Detection of Mordants on 34
Fastness to Light: Measurement 399
Machine for Testing the Fastness to Rubbing of 541
Stripping 536
or Printed Cotton: Group C-Fastness Tests for. A. A. T. C. C. Committee on Fastness to Washing 37
Staple Fibres: Causes and Prevention of Stripiness 259
Textiles: Action of Light 483
Dyeing of Acetate Rayon and of Acetate Rayon Mixed Fabrics 259
Apparatus with Circulating Dye Bath for Piece Goods 259
Improvements 31
of Artificial Fibres 536
Carbonized Piece Goods 31
Casein Fibre Combed Sliver 98
Cellulose Acetate Rayon 211
with Acid and Direct Dyes 349
Fibres with Wool Colors 31
and Cleaning Industry: (New) Synthetic Fibres in the 99
Discussion of Metachrome Method of 34
and Finishing Rayon Fabric. Effects of Acids 539

Sizing Machine for Rayon 257
Slashing Technic: Spun Rayon 209
Tension: Influence of Varying—on Some Physical Properties of Plain Cotton Cloth 258
Washing: Behavior of Staple Fibre on 310
Changes Produced in Staple Fibre Fabrics by 140
of Fabrics: New Method of Open-Width ... 256
Methods: New Views on Effect of Various—on Staple Fibre Fabrics 141
of Wool: Use of Fat Solvents in 482
Washing-off Process in Scouring (of Wool Cloth) 210
Waste Silk: Fermentation Degumming of 478
Wastes: Treatment of Liquid—from the Textile Industry 352
Water of Constitution and Water of Hydration of Animal and Vegetable Textile Fibres ... 299
Repellency and Temperature 214
Repellent: New Type 304
Waterproofing Agent: Aluminum Triformate as a 438
Waterproofness of Fabrics: Testing of 141
Weave: Effect of—on Structure of Cotton Fabrics 168
Weaving Covered-Rubber Yarn 482
Weft: Tension on the—during Weaving 96
Wet Fabrics: Moisture Removal by Centrifuging, Suction and Drying Processes 96
Processing of Textiles: Application of Surface Active Agents in 306
Wettability and Rate of Evaporation of Fabrics: Procedure for Testing the 101
Wetting Agents: Consideration of the A. A. T. C. C. Official and the Canvas Disc Methods for Evaluation of 214
Evaluation of 214
The Official A. A. T. C. C. Method .. 214
New Uses for 99
Winding Machinery: Modern 97
Wool Acetate: Carbonizing 301
Action of Light on 95
(Artificial): Technical Specifications for Casein for the Production of 532
Base-Combining Capacity of 132
Carbonizing 210, 347
Causes of the Damaging Effect of Fat Solvents in the Degreasing of Crude—by Benzine and Tricholoethylene 349
Chlorination of 483
Cloth Scouring Plant: Management of 210
Colors: Dyeing Cellulose Fibres with 31
Competitors of 531
Completely Non-felting—and Its Use in Textile Materials 97
Controlled Scouring of 347
Density of—in Relation to Acid Dyeing ... 536
Destruction of 347
Determination of Lanital in Tissues Mixed with 173
Determining Acid in 102
Dissociation of Ammonium Salts in Contact with 99
Drying Problems 210
Dyeing of—by the Adsorption Method 260
Fast to Perspiration 396
Effect of Metals in 99
Microscopic Observations on 261
Particle Size in 35
Significance of Temperature in 138
Electrophoretic Studies of 167
Emulsion Oiling of Merino 393
Enzymatic Digestion of 104
Enzyme Treatment to Diminish Shrinkage .. 347
Fabrics: Influence of Dyes and Dyeing Processes on the Milling, Strength, and Wearing Properties of Wool Fabrics 99
Intensified Scouring an Added Protection in Finishing of 29
for Printing: Use of Sulphuryl Chloride in Treatment of 138
Tentative Standard Method for Measurement of Resistance to Shrinkage of 309

PAGE

Testing of—for Shrinkage 309
Felting: Theory of 352
Fibre: Contribution to the Histology and Pathology of 439
Protection of—during Scouring and Dyeing 100
Fine Structure of 100, 478
Fineness and Length 102
and Half-Wool: Continuous Dyeing of. Method Based on Theory of Turgescence 483
Insects Attacking 25
Iron Stains on 170
Lanital Mixtures: Dyeing 396
Manufacture: Weathering of the Fleece in Relation to 299
Mean Finensss of—and Standard Deviation.. 38
Method for Promoting the Removal of Mineral Oil from—by Emulsification .. 533
of Titration for Determining Damage to 102
Mordanting—in the Cold 172
New Synthetic Textiles in Relation to 97
Photochemical Decomposition of Cystine in.. 312
Piece Goods: Solvent Extraction of 134
Prevention of Damage to—by Bacteria 212
Principles of Isoelectric Washing of 30
Printing: Technique of 349
Quantitative Method of Determining Slight Injury to 102
vs. Rayon 257
Recent Developments in Methods for Shrinkproofing 136
and Related Fibres: Action of Light on 131
Rubberizing of—and Other Fibres, Yarns or Fabrics 133
Scouring: Efficiency in 97
Liquors: Rapid Control Method for Grease in 307
Some Effects of Alkaline Reagents on 477
Staple Fibre Fabrics: Measuring Felting Power of 440
Sulphur and Cystine—Determination in 400
Unlevel Dyeing of—with Acid and Chrome Dyes 100
Use of Fat Solvents in Washing of 482
Warps: New Size for 97
and Wool Fabrics: Rapid Determination of Moisture in 173
Woolen Carding: Analysis of Speeds in 97
and Spinning: Faults in 28
and Cotton Yarns: Modern Machinery for Dyeing (and Drying) of—in Cheeses .. 31
Fibres: Bleached—Color Test for the Detection of 539
Gilding (Staining) of 29
Woolens and Worsteds: Finishing 169
Worsted Mills: Certified Climate in 168
Yarns: Count Variation in 101

X

Xylene Method: Determination of Moisture in Felt Articles by the 308
X-Ray Diffraction Applied to Chemical Analysis 352
Investigation on a Homologous Series of Cellulose Fibres 299
Studies of New Types of Italian Rayons 348
Study of the Orientation of Artificial Fibre.. 532
of Proteins and Related Structures 299
X-rays: Lap Meter—the Picker Room 30

Y

Yarn Count Variations: Reduction 211
Dyed Fabrics: Finishing 29
Worsteds: Finishing 169
and Fabric Trends in Europe and America .. 304
Quality vs. Staple Quality 209
Strength Irregularity: Effect of Clinging Power of Fibres on 27
Twist: Strength of Knitted Fabrics under Increasing 209
Warp Size Distribution on 96
Yarns and Fabrics: Testing 102
Strength and Extensibility; Influence of Humidity on— 535
Yellowing: Cause of—of Bleached Wool 300
